

PMR PICO REPEATER

PMR Pico Repeater for enhancing coverage
in demanding environments

- Use ultra high linearity amplifier
- SAW filter used providing very sharp out band roll off
- Low spurious, optional remote control and monitoring
- Oscillation cancellation technology

Turnkey coverage solutions

The Eyecom range of repeater products are class-leading in their design, functionality and extreme reliability and with our broad range of available repeaters we are able to tailor a solution that best fits any customer's needs.

The Eyecom High Gain Repeater is the ideal choice where maximum coverage distance or area is required. They are available as either band selective or channel selective and with the option of either on-site configuration or remotely via the Eyecom NMS (Network Management Software).

Typical applications include: Sector coverage extension in car park and confined area coverage in urban area.
